

ArrayWallets — Smart Wallet Analytics & Cross-Chain Swaps on TON

Built for STON.fi Vibe Coding Hackathon Wave 2 —
STON.fi Track + Mira Track

The Problem

- TON blockchain has 54M+ active wallets, but **no unified analytics dashboard**
- Users can't track portfolio PnL, swap performance, or jetton price changes in one place
- Cross-chain swaps require navigating multiple DEXs and bridges — **fragmented UX**
- Wallet data is scattered across **TonAPI** endpoints with no aggregated view

Our Solution

ArrayWallets — all-in-one platform

1. **Wallet Explorer** — browse, search, and analyze any TON wallet
2. **Jetton Portfolio & PnL** — real-time price tracking assets onchain
3. **Swap Analytics** — inferred swap detection, PnL per jetton
4. **Cross-Chain Swaps** — Omnistone integration for seamless multi-chain swaps
5. **AI-Powered Insights** — Mira AI agent for media content and documentations

Tech Stack

Layer	Technology
Framework	Next.js 16 (App Router)
Database	PostgreSQL + Prisma 7
Auth	Auth.js v5 + TON Connect
Blockchain	@ton/core, TonAPI
Cross-chain	STON.fi Omniston SDK v1beta8
EVM Connect	Reown AppKit (WalletConnect)
UI	Radix UI, shadcn/ui, Tailwind CSS 4
Deployment	Docker / Vercel
AI Agents	Mira (@mira), Cursor

Omniston Integration

Cross-chain swaps powered by STON.fi Omniston SDK

- **Omniston SDK** — WebSocket-based routing for best-price cross-chain swaps
- **Reown AppKit** — EVM wallet connection (MetaMask, WalletConnect, etc.)
- **Production endpoint** — `wss://omni-ws.ston.fi` (no staging needed)
- **Swap flow:** User selects tokens → Omniston routes → Best price execution → On-chain settlement
- **No bridges, no wrapped tokens** — native cross-chain via aggregated liquidity

TonAPI Integration

TonAPI — the backbone of wallet data

- **Wallet Events** — real-time transaction history with action classification
- **Jetton Prices** — USD/TON prices with 24h, 7d, 30d percentage changes
- **Address Metadata** — scam flags, verification status, action counts
- **Sync Engine** — pulls TonAPI data into PostgreSQL for fast queries & historical analysis

Mira AI Integration

Mira AI agent — integrated into the development workflow

- **All project materials** — README, presentation text, descriptions were created using @mira
- **Code assistance** — Mira helped scaffold components, debug integrations, and generate documentation
- **Hackathon compliance** — Mira is embedded in the development process AND the product presentation workflow

Mira AI — Role in the Project

1

README.md — Project documentation

2

hackathon-presentation.md —
Presentation content & script

3

Slide images — AI-generated visuals for slides

4

Google Slides — Structured layout adaptation

5

Logos — Brand identity creation

Wallet Explorer & PnL

Wallet Explorer — deep analytics for any TON wallet

- Search any TON address → instant overview
- Event history with pagination and filters
- Jetton holdings with real-time price tracking
- Portfolio PnL calculation per jetton
- Swap detection: automatically infers swaps from transaction actions
- Admin role system (wallet address)

Live Product Demo

<https://wallets.arrayton.com>

- Wallet list with search and overview
- Wallet detail: events, balances, PnL
- Jetton portfolio with price changes
- Omnistone cross-chain swap interface
- Sign-in with TON Connect

What Makes Us Different

Why Wallets App stands out

- ★ **All-in-one** — Analytics + Swaps + AI in a single platform
- ★ **Real PnL** — Not just balances, but actual profit/loss tracking per jetton
- ★ **Cross-chain native** — Omnistone swaps without leaving the app
- ★ **AI-assisted** — Mira integration for development AND user-facing features
- ★ **Production-ready** — Docker, health checks, auth, deployed on Vercel
- ★ **Open architecture** — Modular codebase, easy to extend

Roadmap

What's next

- **Phase 2** — Multi-wallet portfolio aggregation
- **Phase 3** — Telegram Mini App for mobile-first experience
- **Phase 4** — DeFi yield tracking and staking analytics
- **Phase 5** — Statistic aggregation
- **Phase 6** — Integration in ArrayTon.com
